Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	09 November 2022
Team ID	PNT2022TMID03553
Project Name	A Novel Method for Handwritten Digit Recognition System

Functional Requirements:

Following are the functional requirements.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	Registration through Form Registration through Gmail Registration through LinkedIN
FR-2	User Confirmation	Confirmation via Email Confirmation via OTP
FR-3	Upload image	Image upload via files Image upload via folders Image upload via drive Image upload via web Image upload via scan/camera
FR-4	Spelling support	Identifies handwriting of different styles and fonts Spelling check
FR-5	Translation	Handwritten digits from the image are extracted. Conversion of handwritten digits into machine readable form
FR-6	Log out	Log out / sign out.

Non-functional Requirements:

Following are the non-functional requirements.

FR No.	Non-Functional Requirement	Description
NFR-1	**Usability**	The proposed system gives good results for images that contain handwritten text written in different styles, different size and alignment with varying background
NFR-2	**Security**	Only authorized people can access the system data and modify the database.
NFR-3	**Reliability**	The Database is frequently updated with handwriting of different styles and size and will rollback when any update fails.
NFR-4	**Performance**	The proposed system is advantageous as it uses fewer features to train the neural network, which results in faster convergence.
NFR-5	**Availability**	The system functionality and services are available for use with all operations.
NFR-6	**Scalability**	The website traffic limit must be scalable enough to support 2 lakhs users at a time
